Executive Summary

Performance Summary

The META advertising campaign over the last 30 days has generated significant reach but low engagement. With a total spend of \$381,106.63, the campaign achieved 37,635,104 impressions and 312,283 clicks, resulting in a click-through rate (CTR) of 0.83%. This CTR is below the industry standard, indicating potential inefficiencies in ad performance.

Notable Trends

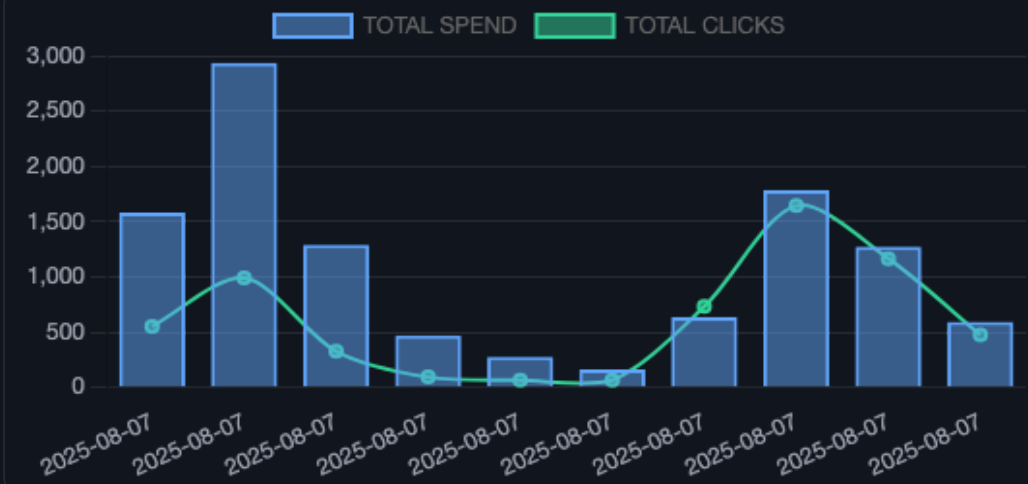

- The age group 25-34 yielded the highest engagement, with 990 clicks from a spend of \$2,935.90, demonstrating a better cost-efficiency compared to other age groups.
- Older age segments (45-54 and 55-64) show significantly lower engagement, suggesting that the content may not resonate with them.

Actionable Recommendations

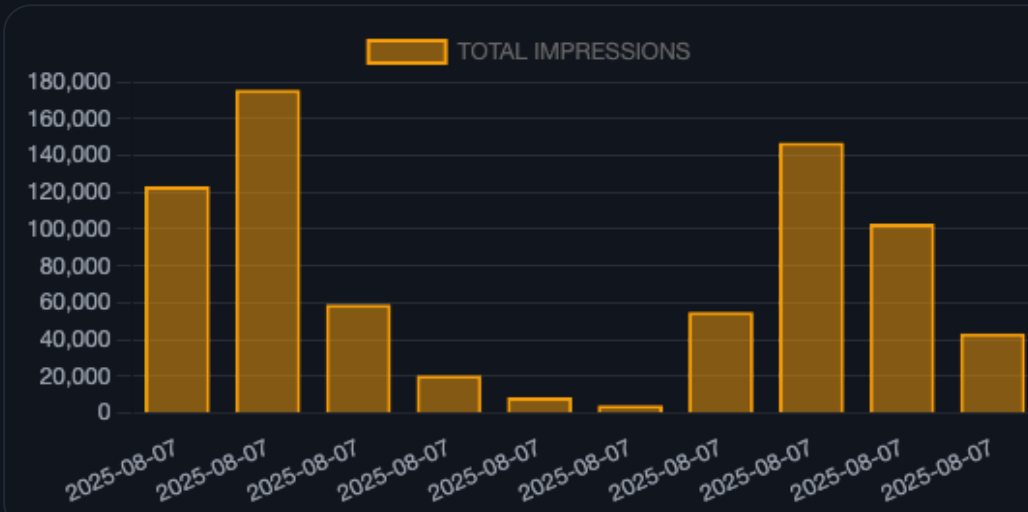

- Reallocate budget to the 25-34 age group, as they show the highest engagement and cost-efficiency.
- Test new creative strategies for older demographics, potentially focusing on messaging or content that aligns better with their preferences.
- Consider optimizing the ad placements to improve CTR, possibly by experimenting with different formats and targeting options.

Report customized for META adset level with 3 selected metrics.
