Executive Summary

Performance Summary

The META advertising data for the last 7 days shows a total spend of \$0.00, with no impressions or clicks recorded. This indicates that the ads are not being displayed or are not successfully reaching the target audience.

Notable Trends or Patterns

Among the sample data, the CPC values vary significantly, ranging from \$1.24 to \$4.65. However, the reach of most records indicates potential engagement, particularly in the US, with numbers exceeding 73,000 in some cases. The presence of a record with "unknown" country and a reach of 1 suggests either misconfiguration or targeting errors.

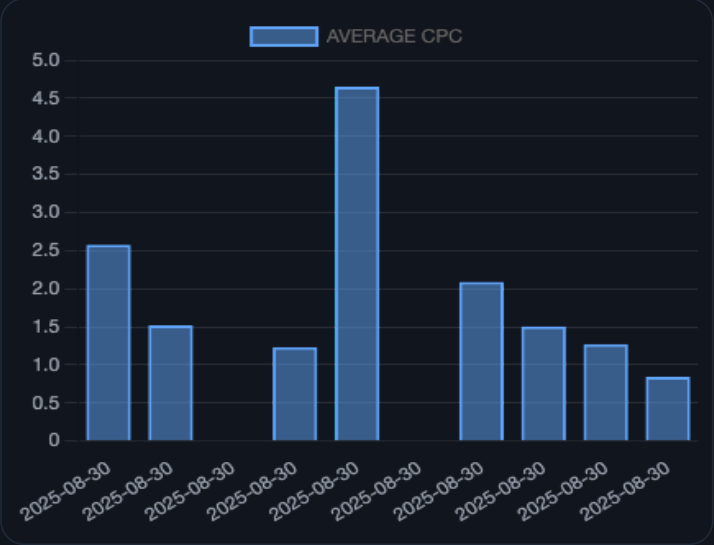

Actionable Recommendations

- Investigate and resolve the issues leading to \$0 spend and zero impressions; check budget settings and ad approval status.
- Optimize targeting to ensure ads reach the intended audience, especially addressing the "unknown" country issue.
- Monitor the CPC closely; consider reallocating budget towards ad sets with lower CPC and higher reach for better cost-efficiency.
