### Executive Summary

#### Performance Summary

The META advertising campaign yielded a total spend of \$89,055.31 over the last 7 days, generating 8,609,491 impressions. However, there were no clicks recorded, resulting in a CTR of 0.00%. This indicates a significant issue with ad engagement.

#### Notable Trends or Patterns

Despite varying costs per click (CPC) across age groups, all ad sets failed to convert clicks. The highest CPC was observed in the 35-44 age group at \$2.90, suggesting that even higher spending did not translate to engagement.

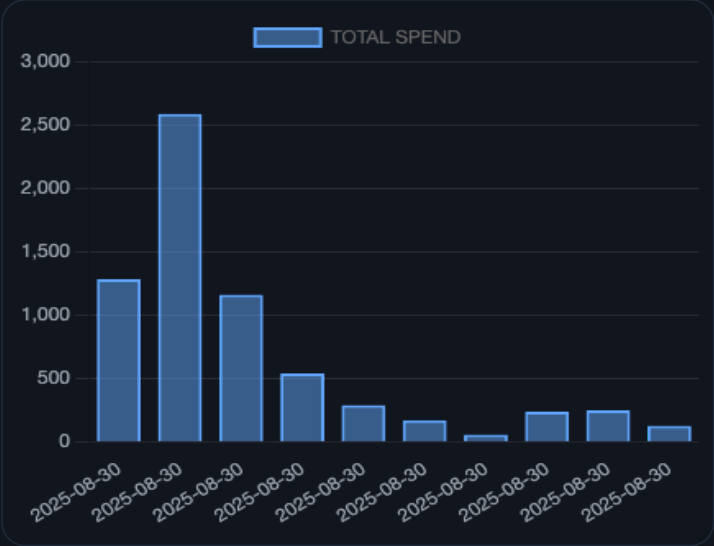

#### Actionable Recommendations for Optimization

- Revise Ad Creative:** Test different ad formats and messaging to improve engagement and click-through rates.
- Target Audience Refinement:** Analyze demographic performance and adjust targeting to focus on age groups with potential interest.
- Increase Budget on High-Impression Ads:** Identify ad sets with high impressions but low engagement, and reallocate budget to experimental strategies for better performance.
