Executive Summary

Performance Summary

The META advertising campaign over the last 14 days generated a total spend of \$178,066.85, yielding 17,045,235 impressions and 136,790 clicks, resulting in a click-through rate (CTR) of 0.80%. The data indicates a moderate engagement level but suggests room for improvement in campaign efficiency.

Notable Trends

Analysis of sample data shows significant variations in performance by age and gender demographics. For instance, the 25-34 age group, particularly males, demonstrated higher engagement with a CTR that surpasses the overall average. Conversely, the 18-24 age group, especially females, showed lower performance metrics.

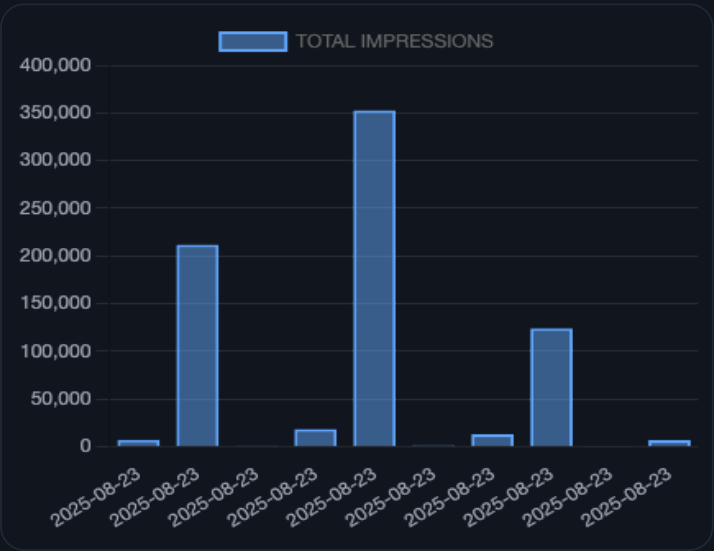

Actionable Recommendations

- Refine targeting for the 18-24 female demographic by experimenting with different creatives or messaging that resonates better with this group.
- Increase budget allocation towards the 25-34 male demographic where engagement is notably higher, optimizing for platforms or ad formats that yield the best performance.
- Conduct A/B testing on ad creatives and calls-to-action to identify which combinations drive higher CTR across all demographics.

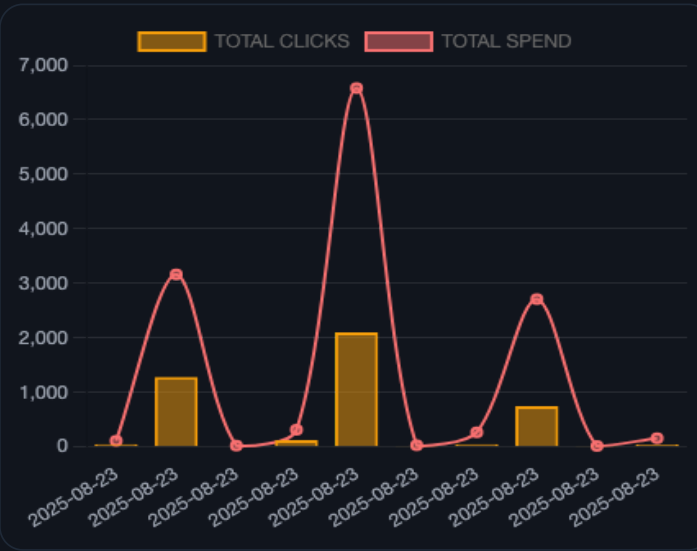

Report customized for META campaign level with 3 selected metrics.
