Executive Summary

Performance Summary

The TikTok advertising campaign has seen a total spend of \$939,945.94, generating 202,951,478 impressions and 1,147,872 clicks, resulting in a click-through rate (CTR) of 0.57%. The overall conversion rate is low, averaging around 2.34% across campaigns.

Notable Trends or Patterns

- The campaign with the highest spend (\$229,459.24) yielded the lowest conversion rate (0.43%), indicating inefficiencies.
- Campaigns with lower costs per click (CPC) tended to have higher CTRs, suggesting a correlation between cost and engagement.
- High frequency (above 6) in some campaigns did not necessarily lead to higher conversions, indicating potential ad fatigue.

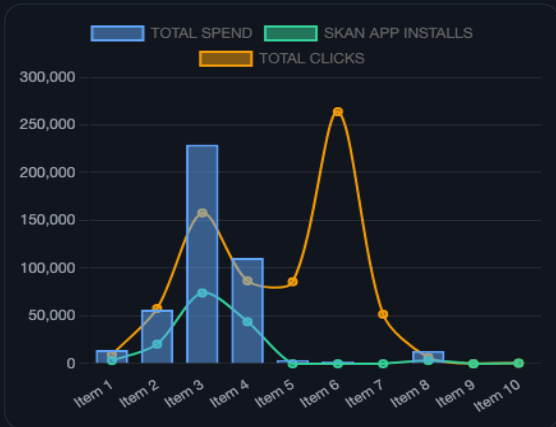

Actionable Recommendations

- Reallocate budget from high-spend, low-performing campaigns to those with better conversion rates and lower costs per conversion.
- Test creative variations and audience targeting to improve CTR and conversion rates, especially in campaigns showing high frequency.
- Implement a retargeting strategy for users who clicked but did not convert, focusing on the campaigns with higher engagement metrics.
