Executive Summary

Performance Summary

The META advertising data indicates a total of 19 ad sets generated 11,040 actions across various types, with an overall cost per action averaging \$30.76. The highest engagement came from males aged 25-34, with significant actions in post engagement and omni activation.

Notable Trends or Patterns

There is a stark contrast in performance between genders, with males showing higher action counts compared to females. The cost per action varies significantly by action type, indicating potential inefficiencies in targeting or ad content.

Actionable Recommendations for Optimization

- Focus on optimizing ad creatives targeting males aged 25-34, as they yield the highest engagement and actions.
- Consider reallocating budget from lower-performing action types to those with a higher volume of actions and lower cost per action, particularly in video views and post engagements.
- Implement A/B testing on ad sets to refine targeting and messaging, aiming to lower the average cost per action across all demographics.
